GREEN APPLIANCES

There are plenty of eco-friendly appliances for every room in the home.

KITCHEN:

- ✓ Electric Kettle
- ✓ Energy Star labeled fridge
- ✓ Water-saving dishwasher
- ✓ Composter
- ✓ Low-power electric ovens

LAUNDRY ROOM:

- ✓ Low-energy, cold temp washing machines
- ✓ Tumble dryers or heat pump dryers

EVERYWHERE ELSE:

- ✓ Programmable thermostat
- ✓ LED light bulbs

REDUCE, REUSE, RECYCLE (EVERY DAY)

The 3Rs never go out of style. Here are some easy ways to integrate these principles in your home:

- Swap out plastic trash bags with ones that biodegrade.
- Buy recyclable/reusable baggies, food storage, and containers.
- Collect rainwater (if allowed in your state).
- Buy fewer prepackaged items and always take your own bags to the store.
- Learn how to fix, rather than replace, items in your home.
- Recycle electronics, especially old tech and batteries.
- Use your local recycling resources!

A GREEN GARDEN

Did you know that using native species is better for the local climate?
Plus, they grow best and look great!

Here's how to get started:

01

Use the internet to find out what climate zone you live in.

02

Search for plants that are local flora/fauna to your zone and region.

03

Identify a few that are within your price range and would grow in the space you have.

04

Purchase seeds locally. Even better: save seeds from locally grown fruit, veggies or have neighbors graft you a piece of their plants.

You may wish to consult with a gardener, arborist, or other plant specialists in your area. This gives you the advantage of learning locally and doing what's best for your local area!

HOW TO MAKE GREEN GOING GREEN

Believe it or not, going green doesn't just have the moral benefit of helping the earth! There are a lot of ways that being eco-friendly actually saves you money.

For instance:

- Long-term costs savings show up in the form of decreased energy bills.
Energy-efficient appliances save you money!
- Reusable packaging and containers only require a one-time investment, which saves money in the long run.
- Growing your own plants and even food saves money in landscaping... and groceries!

Many states also provide rebates for green upgrades and improvements to your home:

- Federal tax credits are available for geothermal, wind, and solar improvements.
- You may be eligible for a Residential Energy Tax Credit after upgrading windows, appliances, or systems in your home.
- Federal, state, and local government agencies offer a variety of tax credits, rebates, and savings programs that can offset the cost of going green.
